MAXIMUM RELIABILITY AND PRODUCTIVITY FOR HIGH DEMAND MAILING

REDEFINING THE STANDARD WITH UNRIVALED CAPABILITIES

Business Mail is a tool that allows you to acquire new customers, promote the value of your business, fulfill orders and transactions, and strengthen relationships with existing customers and business partners. Your mail center is the hub of activity in your company's business. High demand means

you need to count on mailstream equipment that delivers the utmost in reliability and productivity. That's why Secap offers the DP1100™ Digital Mailing System. This high speed workhorse handles all types of mail, of various weights and sizes and is always ready when you are. Rely on the DP1100™, the system that's been designed with your business in mind.

Engineered for Endurance and Optimum Uptime

The DP1100™ has been designed to withstand ongoing and long-term operational impact in a high-volume mailing environment. With more capabilities and fewer moving parts, you can depend on consistent dependability of performance.

DIRECT ACCESS TO A COMPLETE SUITE OF MANAGEMENT INFORMATION AND SERVICE CAPABILITIES

When the mail needs to go out, the DP1100™ is a vital and integral part of your operation. The system comes fully equipped with the IntelliLink® technology that delivers single point access to manage your operation efficiently and effectively. You can easily activate and control all of the functions of the DP1100™ directly from the control center.

Constant Connection

- 24/7 High Speed Internet Connectivity provides speedy downloads.
- Upload Confirmation Services transactions for convenient mail piece tracking.

USPS® and Other Carrier Services

- IntelliLink® downloads carrier and postal rate class and service changes directly to your system when you need them.
- 24/7 access to prepay for postage or get a postage advance.
- Get instant updates while eliminating near term obsolescence.

Download USPS® Confirmation Services

- E-Return Receipt eliminates traditional return receipt "green card".
- Delivery Confirmation™ confirms date, zip code and time of delivery.
- Signature Confirmation™ gives proof of delivery with recipient's signature.
- Certified Mail™ provides proof of mail and tracking number to obtain delivery details online.

Unlimited Accounting Options

- Track your accounts. Manage, track and charge-back departmental or client costs.
- Standard INVIEW™ Accounting tracks and displays expenses for up to 300 accounts.

DETAILS - DP1100™ DIGITAL MAILING SYSTEM

1. True Mixed Mail Feeding

Eliminates manual sorting of varying types of mail. The DP1100™ accepts up to a 6" stack of material in a continuous stream. Even bubble pack envelopes move effortlessly through the system with accurate rating and solid postage application.

2. Auto Sensors

Postcards and "dark mail" can be difficult to process. But not for the DP1100™. Equipped with advanced detection sensors throughout the feeding and transport path, difficult material is processed painlessly. The sensors automatically align the mail piece to protect its contents while ensuring precise postage printing.

3. Single Source Control Center

This integrated and intuitive interface is your command center. It allows you to direct your system from this single, central location. The control center swivels so that it can easily be seen from all operation angles, and easily detaches for connection to a high speed internet connection. Stores up to 25 preset jobs.

4. Weigh-on-the-Way®

In line weighing processes mail automatically at 145 letters per minute, handling mixed-sized mail up to 12" x 15" and weighing up to 16 oz. WOW® comes complete with Shape Based Rating so the system individually weighs your mail pieces, measures the size and sets the system to print the correct postage on each piece.

5. Tip to Tip Sealing

The DP1100™ accommodates mixed envelope flap configurations including open and closed flaps and seals them effortlessly. Exclusive sensors identify the envelope flap type and applies the appropriate amount of sealant and roller pressure giving you the confidence that any style envelope is securely sealed.

6. Interfaced Weighing Platform

Choose from 15 lb. to 149 lb. weighing platform options. Differential weighing calculates individual piece weights as they are removed from the scale and proper postage is printed. This greatly speeds the processing of mixed weight mail and parcels, and increases your mailroom efficiency.

7. Stacking Options Provides Flexibility

Neatly stacked mail maximizes throughput speeds and enhances mail handling.

8. Ergonomically Designed Console

Provides comfortable working height for maximum productivity, minimizes noise and vibration and has ample storage for supplies.

Step by step instructions are simple to use for any level operator.

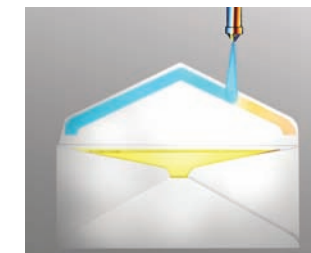

Prints USPS® compliant indicia. Add your choice of downloadable postal inscriptions or messages to your mail.

Process More Mail in Less Time

High volume mailers demand speed and get it with the DP1100™. There is no other mailing system in its class that can get your big jobs done at the speeds the DP1100™ can handle. This system automatically feeds, seals, prints postage and stacks up to 295 pieces per minute of uniformly sized mail. You can rely on the advanced technology of the DP1100™ to help you get jobs out the door quickly.

True mixed mail feeding allows varying types of mail to move through the system effortlessly.

Jet spray sealing applies the right amount of sealant to the glue line ensuring tip to tip sealing.

Auto Tape Mode sets the system to generate a tape when heavier material is placed on the scale.

With the drop in roll tape system, your tape usage will be efficient as each tape is cut to exact size.
