For cartridge selection

Physical Characteristics:
Dimensions:
6"W x 12"D x 30"H
(hardware/mounting bracket included)

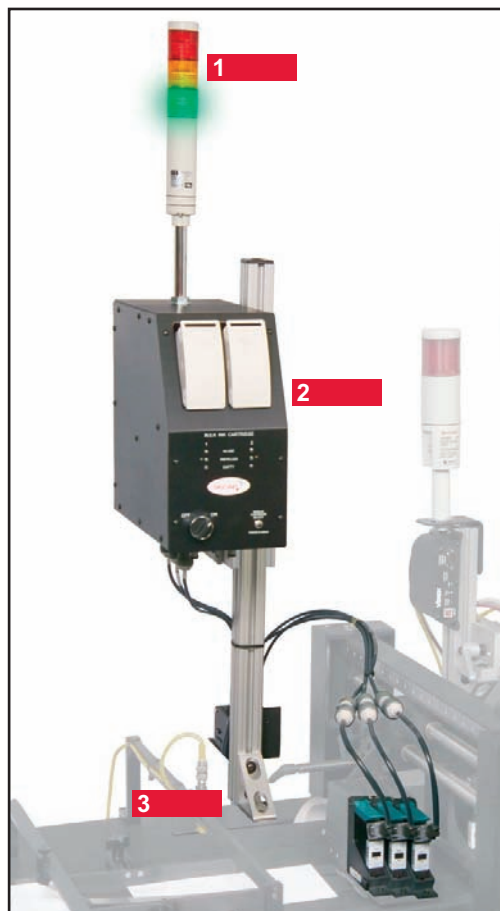

Weight: 14 lbs.

Power: 115 VAC

Included in standard package:

- Control box with electrical connections
- Regulators: 1-8 depending on configuration
- Light bar
- Hardware and mounting brackets

(Specifications subject to change without notice.)

DETAILS

The Secap Ink Management System is an ideal solution for increasing print production while reducing operator intervention during long production runs.

1. Intelligent

SIMS sophisticated technology monitors physical components in the ink reservoir and uses audio/visual indicators for low ink levels and ink status through easy to read LED's, a lightbar, and an alarm system.

2. Productive

Provides users with a highly reliable solution for improving print quality and productivity while delivering lower per piece consumable cost. Maintain long uninterrupted production runs with little worry of print quality issues due to low ink and out of ink situations. Handles two HP 350 ml bulk ink cartridges.

3. Mounts to Mail Table Bases

SIMS is software and system independent, enabling it to work on a wide range of printing equipment. Can be retrofitted to existing mail table bases providing users with a flexible system that delivers substantial ink cost savings.

4. SIMS and the Jet 1

SIMS can be mounted to the highly productive, one person operated Jet 1 System making this combination the ultimate solution in productivity and cost savings.

5. SIMS and the SA5300

SIMS can also be added to the Secap® SA5300vt for high volume addressing and imaging with the highest quality and reliability.
